e-BRIDGE Global Print

- Submit print jobs to the cloud from anywhere for location flexibility
- Release print jobs on demand conveniently and securely with access card or pin
- Eliminate IT overhead costs associated with managing print servers and more

TOGETHER
INFORMATION

Printing made simple for the everyday workforce

As modern work models continue to evolve, proven productivity tools like print can create unique challenges. When employees are travelling, working from home, or are simply on-the-go without easy access to network printers, keeping everyone productive becomes difficult. Fortunately, e-BRIDGE Global Print simplifies printing from wherever you work, allowing you to send print jobs directly to cloud-connected Toshiba MFPs, and then release when ready at the printer of your choice. And, thanks to industry-leading security, the entire experience is worry-free for you.

Worry-free printing from wherever you are

While working from anywhere has its advantages, remote printing can be complicated. Many work from multiple locations with different printers at each one, making it difficult to know how to quickly print. Or they can't queue up print jobs from home and release them at work, which disrupts the natural workflow. Remote printing can be a struggle for IT as well. Setting up multiple drivers and print servers puts a strain on an already busy department. Fortunately, e-BRIDGE Global Print takes the hassle out of printing for employees and IT alike, adding up to a more productive workforce.

e-BRIDGE Global Print makes it easy to:

- Submit print jobs to the cloud from anywhere for location flexibility
- Sign in from Google Workspace™ or Microsoft365® accounts to quickly enable printing
- Release print jobs on demand conveniently and securely with access card or PIN
- Gain insights into your printing and devices with MFP usage logs
- Eliminate IT overhead costs associated with managing print servers and more

Further benefits

Submit print jobs to the cloud

For your workplace to truly be flexible, employees need to be able to print from their home office, client's office, coffee shop, or from anywhere, really. e-BRIDGE Global Print makes this easy. Once users simply install the Toshiba universal print driver onto their computer, they can send print jobs from virtually anywhere, and from any network.

Authenticate with the latest security standards

With e-BRIDGE Global Print, you can easily sign in from your Google Workspace™ or Microsoft 365® accounts to quickly enable printing. All documents are securely transmitted to and from the cloud hosted by Microsoft® Azure® and Amazon Web Services™ (AWS). And we've also simplified secure authentication by allowing users to log into the MFP using a dedicated PIN, access card or badge. It's your choice and best of all, little to no training is required.

Release print jobs on demand

e-BRIDGE Global Print ensures that the user has ultimate control over their print jobs. Since a job is submitted to the cloud, it can be printed on demand from any Toshiba MFP, without worry that the printout will be left for others to see. With one simple sign-on from the MFP embedded application, a print job is released when the user is ready to receive it, keeping sensitive documents secure and reducing waste from forgotten printouts.

Gain insights into print trends and devices

Tracking your MFP usage with e-BRIDGE Global Print comes with distinct advantages. MFP usage logs provide insights into every single print job, regardless of where it originated. This allows the administrator to create reports, making it easier to gain insights on device usage and user productivity.

Increase focus and collaboration

Digital media certainly has its advantages; however, employees often find it easier to stay focused and be more engaged with printed materials. Thanks to e-BRIDGE Global Print, you can now print from virtually anywhere and pick up meeting materials with ease to allow for increased connection and collaboration, and, ultimately, a rise in productivity.

Flexibility for the workplace

e-BRIDGE Global Print from Toshiba provides a simple and secure way of printing for the everyday, anywhere, workforce. It's easy to set up and start printing in no time, so you can focus on what's important and stay productive without dealing with unnecessary print frustrations.

If you are looking to adopt a more flexible way of working, then cloud printing solutions are a valuable tool, and can help you make significant savings, and empower everyone across the business to better manage their print jobs.

Connect with your Toshiba cloud print experts to learn how you can simplify printing from wherever you and your team work.
